

Getting started with Addie

A real member of the Addie team configures the account with your counselors in one focused working session. Your team leaves ready to operate the program independently.

CONFIGURATION + TRAINING

Bring four decisions. Leave launch-ready.

Choose the grade or grades, first date, school owner, and participating counselors. We connect the proven journeys to your calendar and teach the team to manage the account.

WHY SCHOOLS BRING ADDIE INTO THE PROGRAM

Students reflect and explore

Voice or text gives students time to explain how they learn, what matters, and where they may thrive.

Counselors start prepared

The Student Ledger connects the context needed for meetings, recommendations, fit, and follow-up.

Leadership sees human impact

The school sees participation, readiness, counselor use, and where human attention is going.

COME PREPARED WITH

Program decisions

Why now · grade(s) · first launch date · school owner · participating counselors

Operational contacts

Roster/data owner · communication approver · human-review contacts

This is not another discovery call.

It is a working session in the real product with a real Addie team member.

30-MINUTE CONFIGURATION + TRAINING

Configure while your team learns.

1. Select grade journeys

Choose Grade 9 Know, Grade 10 Explore, Grade 11 Plan, Grade 12 Act—or a combination.

The developmental work is defined.

2. Set dates and assignments

Align conversations, voice-note prompts, tasks, and deadlines to the school calendar.

The work fits the calendar.

3. Add counselors and students

Use a secure roster and confirm counselor assignments, permissions, and communication.

The right people are routed.

4. Learn to run it independently

Change dates, send prompts, assign work, monitor engagement, and manage the account.

The school stays in control.

The school provides

- School owner and participating counselors
- Grade(s), students, and secure roster
- Dates and school-approved communication
- Human-review contacts and support protocol

Addie provides

- Grade-specific journeys and Student Ledgers
- Configuration, accounts, and launch materials
- Counselor dashboard, progress visibility, and support
- Training and a clear operating cadence

Leave with a launch-ready account and a team that can operate it.

Book a demo or start the configuration conversation at getaddie.com/get-started.
